

## Infinite Rotation Oxyfuel Triple Bevel Head

### Description:

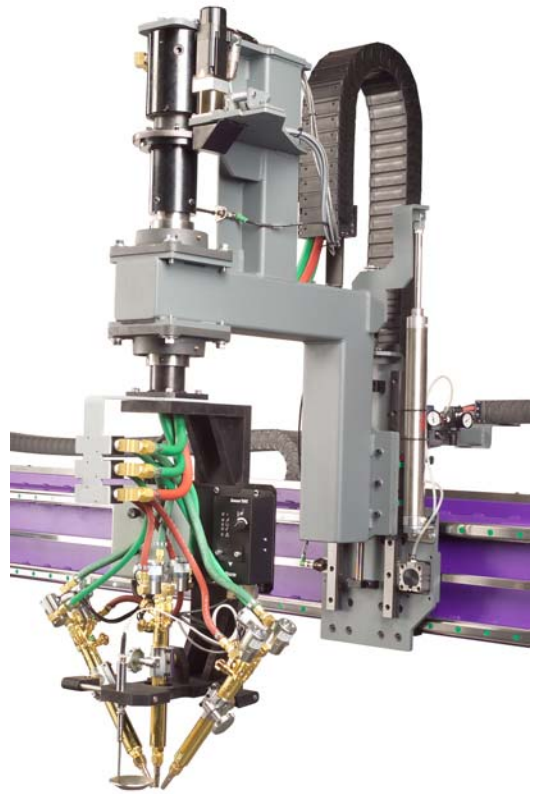

The Retro Systems Infinite Rotation Oxyfuel Triple Bevel Head provides continuous bevel cutting of mild steel to create the top and bottom cuts in a single pass. The center torch is set to vertical and the side angle torches are set to the desired bevel angle. Cutting path and rotation are fully controlled by the **Mariner™** CNC control. Torch to plate height is set and maintained with a capacitive torch height control driving a servo motor.

### Features:

- Cutting Speed and Rotation Controlled by Mariner
- Infinite Rotation Collar – No Un-Wrapping
- Cuts top and bottom bevels in single pass
- Capacitive height sensor maintains torch position

### Applications:

- Triple bevels on heavy steel plate
- Edge prep for heavy weldments
- Available on MEGA HORNET
